

Christmas Tree Craft

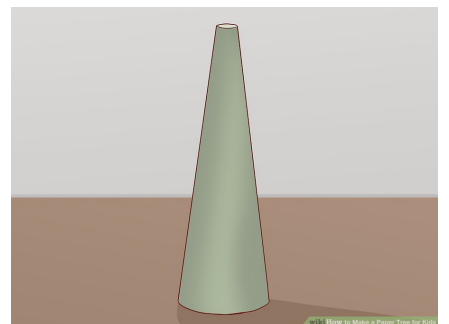

SUPPLIES NEEDED

- Green construction paper
- Scissors
- Tape
- *Optional:* Glitter or other decorations
- *Optional:* Star Tree-Topper with the name of your Sunday school

WHAT TO DO

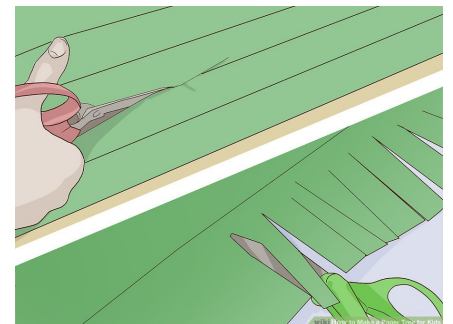

1. Make your Base Cone.

Using green construction paper, roll and tape it into a narrow cone, which is as tall as you want your Christmas tree to be.

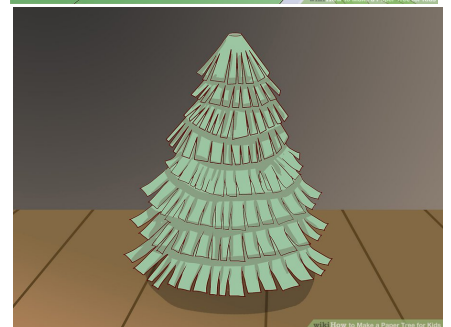

2. Cut strips for the Branches.

Cut long strips of the green construction paper to about 2-3 “ wide. Cut slits close together all along the bottom edge, leaving about $\frac{1}{2}$ ” at the top to create the fringe of the branches.

3. Add on the Branches

Starting from the bottom and working your way up in rows, tape the strips, fringe side down, around the tree.

4. Fluff the Branches

Once you've added on all the strips, fluff up the fringe (especially near the bottom) to make the tree look fuller.

5. Decorate Your Tree

You can use glitter glue, beads, puff balls, pipe cleaners, and any number of other materials to decorate your tree. Don't forget to make a tree topper!
